JET TENDERS

AS POWERFUL AS YOU NEED

Agilis 330 is powered by the centrally mounted Rotax 900 ACE power plant, the most compact and economical, yet powerful watercraft engine. Designed specifically for delivering years of reliable fun, this 90 HP ROTAX features Closed-Loop Cooling System that prevents corrosive saltwater from entering the engine. Advanced Combustion Efficiency technology (ACE) minimizes mechanical friction and improves thermodynamic efficiency for optimal performance. Finally, this engine is environmentally friendly.

COMPACT, NOT SMALL

We know that regardless the size of your yacht, you expect to get the most out of your jet tender. Our freshly forged Agilis 305 is packed with everything that should be in a full-fledged tender but in a more compact package. Everything to make 330 your safe and practical partner in everyday tasks and soul mate in moments of joy.

YOUR LEVEL OF RESPONSE

Operating electronically, engine's intelligent throttle system (ITC) starts you in neutral for easy dockside starts. It also features activity - specific Touring and Sport modes that can all be set to accommodate your riding style. The result is a more responsive more intuitive ride.

LEADING STABILITY

Precisely designed hull contributes to industry leading stability at both slow and high speeds and improves offshore performance. Inflatable tubes are made of ORCA® engineered fabrics, which is highly regarded in marine industry for its reliability and strongest resistance in rough conditions.

JET PROPULSION WITH VTS

The jet propulsion system with stainless steel impeller delivers surgically precise maneuverability, improved acceleration, higher top speed and less cavitation. The variable trim system (VTS) allows to adjust watercraft trim. When you trim up, you'll have a drier ride, which helps when towing. When you trim down, you can ride more aggressively while staying glued to the water.

YOUR SAFETY

Your safety onboard Agilis 305 is backed by clear and functional instrumentatishn and digital dashboard, parallel power system that includes automatic power switch and optional second battery. Also 330 is equipped with automatic gas extinguishing system.

EASY DOCKING

Intelligent brake and reverse system (IBR) allows you to quickly and easily switch between forward and reverse, stop much sooner and in combination with off-throttle assisted steering (O.T.A.S.) results in greater close-quarter maneuverability and easy docking.
